- **RFIM-20B:** the wireless contact converter changes your existing button / switch to a wireless one.
  - two inputs enable control of two units independent.
  - battery power supply (3 V / CR2477 - included in the supply) with battery life of around 5 years based on frequency of use.
  - contact can be permanently closed (does not drain on the battery).
- **RFIM-40B:** the wireless contact converter changes your existing button to a wireless one.
  - four inputs enable control of four units independently.
  - battery power supply (2x 3 V / CR2032) with battery life of around 5 years based on frequency of use (included in the supply).
  - only impulse control
- It can be used to transmit information on switching on the contact (detector, button, technology, logic output).
- The BOX design lets you mount it right in an installation box under the button or switch.
- When pressing the button, it sends a set signal (ON/OFF, dimming, time switching OFF / ON, blinds up/down).
- Sending a command is indicated by a red LED.
- Option of setting light scenes, where with a single press, you can control multiple units of iNELS RF Control.
- Range up to 200 m (in open space), if the signal is insufficient between the controller and unit, use the signal repeater RFRP-20 or protocol component RFIO<sup>2</sup> that support this feature.
- Communication frequency with bidirectional protocol iNELS RF Control.
